SUMMARY

Full Stack Developer and AI Integration Engineer with 1+ years of experience building and shipping production-grade web, mobile, and AI-powered SaaS platforms using React, Next.js, Node.js, FastAPI, and PostgreSQL. Proven expertise integrating Generative AI APIs and RESTful APIs into scalable cloud systems on AWS (EC2, S3) and Firebase — delivering end-to-end solutions across the full software development lifecycle in Agile environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, React Native, Redux, Tailwind CSS, Material UI, Leaflet.js, Axios
Backend: Node.js, Express.js, FastAPI (Python), RESTful APIs, JWT, OAuth 2.0, Multer
AI Integration: Generative AI APIs, OpenAI API, Google Veo 3, AI Video Generation, Prompt Engineering, API Integration
Databases: PostgreSQL, MongoDB, Firebase Firestore, Prisma ORM
Cloud & DevOps: AWS (EC2, S3), Firebase Hosting, Render, Docker, Git, GitHub Actions, CI/CD, Vercel
APIs & Tools: Stripe, Cloudinary, Resend, OpenStreetMap, Google Analytics, Postman, Jest
Methodology: Agile / Scrum, Git Workflows, Code Review, REST API Design

WORK EXPERIENCE

Freelance Full Stack Developer

Feb 2025 – Present

Self-Employed | Remote

- Independently architected and delivered 4+ full-stack client projects end-to-end using Next.js, Node.js, FastAPI, and PostgreSQL — spanning requirements, system design, development, testing, and AWS deployment.
- Integrated Generative AI and third-party APIs into client platforms, enabling intelligent content automation features that directly drove client monetization.
- Provisioned and managed AWS infrastructure (EC2, S3) for production environments, reducing per-client hosting overhead by up to 40%.

Full Stack Engineer

Nov 2025 – May 2026

Infini8 AI | Remote, England

- Spearheaded frontend development of an AI-powered content generation SaaS platform using React 19 and Axios in an Agile team environment, serving 500+ active paying subscribers.
- Integrated 3+ third-party Generative AI APIs — automating video, caption, and image generation pipelines — unlocking new revenue streams and cutting manual content production time by around 60%.
- Deployed and maintained scalable application infrastructure on Firebase with CI/CD pipelines, achieving 99%+ uptime across production releases.

Junior Full Stack Mobile Developer

Aug 2025 – Nov 2025

NextGenXolution | Wah Cantt, Pakistan

- Developed cross-platform mobile application features in React Native targeting iOS and Android from a unified TypeScript codebase, collaborating within a cross-functional team.
- Built and documented RESTful APIs with Node.js, Express.js, and MongoDB — covering authentication middleware, CRUD operations, and structured API documentation.
- Engineered a media upload pipeline using Multer and Cloudinary, supporting reliable image and video handling for 300+ mobile users.

PROJECTS

Data Lumio *React, Redux, FastAPI, AWS S3, Firebase Auth, Stripe, Tailwind*

datalumio.co | [GitHub](#)

- Built an AI-powered, no-code data analysis SaaS platform — researchers upload spreadsheets, PDFs, and survey files to clean, visualize, and export insights without writing code.
- Implemented Stripe subscription billing, Firebase Auth, and AWS S3 file storage; added Google Analytics to drive data-informed product decisions.

Maqaam *Next.js, Node.js, PostgreSQL, Prisma ORM, JWT, AWS EC2, Resend*

maqaam.me | [GitHub](#)

- Developed a full-stack Islamic community platform with dedicated admin and user portals — users create map-powered events via OpenStreetMap; admins moderate submissions through a role-based dashboard.
- Designed a normalized PostgreSQL schema with geo-filtering queries; secured sessions with JWT authentication and deployed on AWS EC2.

PAPU.AI *React.js, FastAPI, Firebase, Stripe, Google Veo 3*

papu.ai | [GitHub](#)

- Delivered a production AI SaaS platform enabling users to purchase credits and generate cinematic AI videos, avatars, and images via Google Veo 3 — serving 200+ users on subscription and pay-per-use tiers.
- Orchestrated a multi-model Generative AI pipeline via FastAPI with Firebase real-time sync and Stripe billing, fully monetized from launch.

LIBMAX *React Native, TypeScript, Node.js, Express.js, MongoDB*

[GitHub](#)

- Delivered a cross-platform library management app serving **1,000+ active users** at University of Wah — covering book reservations, e-book access, research publications, and campus announcements.
- Implemented role-based access control (student/faculty) in TypeScript end-to-end with Cloudinary cloud storage for academic content.

EDUCATION

Bachelor of Science in Computer Science

Sep 2021 – Aug 2025

University of Wah | Punjab, Pakistan | GPA: 3.27 / 4.0 | Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Engineering, Software Engineering, Operating Systems, Computer Networks
